PROFESSIONAL SUMMARY

Full-stack developer and BSIT graduate building operational web systems with Next.js, React, Node.js, and PostgreSQL. Shipped workforce, payroll, and apartment-billing platforms used in real workflows, with experience in role-based access, audit trails, automated notifications, third-party integrations, and PDF generation.

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer — D.ARK+

Remote | May 2026 – Present

D.ARK+ OPS Live | GitHub

- Delivered the core D.ARK+ OPS MVP within the first month; the system is now in maintenance with targeted operator-requested workflow and quality-of-life improvements.
- Built a Next.js, TypeScript, and PostgreSQL workforce and semimonthly payroll platform supporting 9 employees across two pay dates per month.
- Implemented time entry, overtime, leave, holiday rules, payroll locking, role-based access, audit trails, cutoff calculations, and employee PDF payslips.
- Currently developing the company's separate Next.js marketing website with responsive project pages and interactive React Three Fiber architectural showcases.

Freelance Full-Stack Developer — True Nest Home Care

Remote | Jul 2026 – Present

GitHub | Early discovery and architecture

- Leading early discovery for an SEO-focused marketing website and an internal platform covering employee, client/patient, scheduling, and billing workflows.
- Defining user roles, data models, APIs, and phased delivery using Next.js, TypeScript, NestJS, PostgreSQL, and Prisma.

IT Intern (OJT) — Ollopa Corporation

Quezon City | Sep 2025 – Dec 2025

- Reviewed websites and documented functional defects clearly for stakeholder follow-up during iterative review cycles.
- Supported sales operations through IT troubleshooting, system-related assistance, and coordination under production deadlines.

Freelance Google Apps Script Developer — Self-Employed

Remote | Jun 2025 – Jul 2025

- Automated Google Sheets workflows to eliminate repetitive manual data entry and improve consistency.
- Built scripts to extract, transform, and synchronize external API data into spreadsheet-based business processes.

SELECTED PROJECTS

Glenda Residences — Apartment Management & Billing System

GitHub

React, Express, PostgreSQL, Telegram Bot API, httpSMS, pdfkit, Railway

- Built and deployed an admin dashboard and Telegram bot sharing one data model for tenant records, meter readings, utility billing, payments, and reminder workflows.
- Designed PostgreSQL production storage with startup migrations and a SQLite development fallback for rooms, readings, bills, and SMS delivery history.
- Automated electricity and water calculations, PDF bill generation, webhook-driven bot operations, and SMS reminders through httpSMS.

Daarkin — Job Application Tracker

Live | GitHub

React, TypeScript, Vite, Node.js, Express, PostgreSQL, Gmail OAuth, Vercel

- Built a full-stack hiring-pipeline tracker with authenticated application, status, note, event, compensation, and offer workflows in a shared monorepo.
- Integrated multiple Gmail and Google Workspace inboxes through OAuth to match messages, update application events, and create records from clear application receipts.
- Implemented job-URL metadata extraction, offer comparison and scoring, guided interview reminders, and automated API and integration tests.

DripMon — Cobblemon Server & Tournament System

Discord | NeoForge

Java, NeoForge, Node.js, Express, Discord.js, PokeAPI, Pterodactyl API

- Connected a Java NeoForge mod and Node.js Discord service through authenticated HTTP to relay live server events and role-gated administration commands.
- Integrated Discord chat and Pterodactyl server controls, using shared-secret validation and timing-safe comparison for mod-to-service requests.
- Built tournament exports and public team views enriched with PokeAPI data, backed by in-memory and disk-persisted caching to reduce repeated requests.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, SQL, Python

Frontend: React, Next.js, HTML, CSS, Tailwind CSS, Vite

Backend & Data: Node.js, Express, Django, PostgreSQL, SQLite, Prisma ORM, REST APIs, webhooks

Integrations: Auth.js, Telegram Bot API, Discord.js, PokeAPI, Pterodactyl API, httpSMS, Google Apps Script

Deployment & Testing: Railway, Vercel, Git, GitHub, Playwright, API and integration testing

EDUCATION

Bachelor of Science in Information Technology

Aug 2020 – Dec 2025

Cebu Institute of Technology – University, Cebu City, Philippines

CERTIFICATIONS

- Huawei HCIP-Storage V5.0
- Huawei HCIA-Storage V4.5
- Huawei HCIE-Storage V2.5
